WHO IS B H S?

At B H S, everything begins with Precision. We safeguard the first and last mile of domestic transportation and operate specialized warehousing for sensitive, high-value cargo.

With full capabilities across the service chain, our customers know they can depend on us from transport to installation of advanced manufacturing machinery and tools. Precision means the job is done right the first time.

BHS
50
YEARS
SINCE 1975

OUR SOLUTIONS

- Precision in tailoring solutions to each customer's needs
- Trusted partner for moving high-value, sensitive cargo
- We innovate to achieve Precision in every solution

DE-RISKING OUR CUSTOMERS' BUSINESS : OUR SOLUTIONS

Mitigating your Risk through our Approach.

OUR SOLUTIONS

- Precision in tailoring solutions to each customer's needs
- Trusted partner for moving high-value, sensitive cargo

PROVEN PRECISION FOR OUR CUSTOMERS

National Infrastructure & Transport

- First to install a bridge for Singapore's MRT system at Jurong East
- First approved for airside tarmac transfers
- First to build a 12-inch Fab AMHS system

Semiconductor Leadership

- First to deploy roller-bed trailers for the semiconductor and aviation industries
- First to handle 300mm wafer transportation and rigging
- First to transfer datum marking from AutoCAD to the factory floor
- First to digitise a fab floor, enabling a digital twin

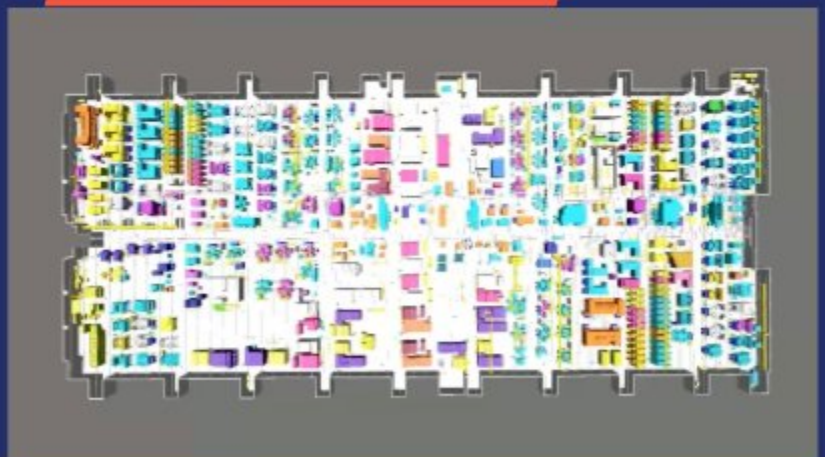

Sensitive Cargo Handling

- First entrusted to transport China's national treasures, giant pandas Jia Jia and Kai Kai, during their loan to Singapore

Introduction to B H S

Creation of a Digital Twin

Precision Across Every Service

At B H S, Precision ensures equipment is moved safely, stored securely, installed accurately, transported reliably, and planned with confidence.

Build-IT – Precision in Complex Installations

- Installation and decommissioning of photo lithography systems
- Expertise in Automated Material Handling Systems (AMHS)
- Trusted to deliver projects in cleanroom environments worldwide

Store-IT – Precision in Readiness

- Secure warehousing to bridge transport, relocation, and installation
- ISO Class 6 cleanroom for testing, assembly, and preparation
- Climate- and humidity-controlled storage for sensitive tools

Move-IT – Precision in Every Lift

- Rigging and relocation for advanced manufacturing equipment
- Surveys and planning before every bespoke move
- Trusted to deliver projects in cleanroom environments worldwide

Pack-IT – Precision That Protects

- Export-ready crating for sea and air shipments
- Multi-layer protection against vibration, impact, and moisture
- Packaging support for overseas transfers, pre-installations, and post-decommissioning

Truck-IT – Precision on the Move

- Customised fleet for high-value and sensitive cargo
- Air-ride and temperature controlled units for safe handling
- Subscription-based or ad-hoc trucking options

Twin-IT – Precision in Digital Planning

- Digital twins that replicate facilities and tools with accuracy
- 3D scanning for reliable layout and planning
- Datum marking transferred precisely from design to floor

PRECISION CLEANROOM FACILITY IN SINGAPORE

B H S delivers Precision in advanced equipment installation. With a Class-1000 cleanroom on our Singapore premises, we configure and customise space to meet the strictest technical specifications. This facility is also available for customers to rent for training, testing, and preparation.

BHS
BUILD-IT

GLOBAL PRECISION

IN ADVANCED EQUIPMENT ASSEMBLY, INSTALLATION AND DECOMMISSIONING

Since 2013, our Build-IT team has specialised in mechanical installation, equipment assembly, and the integration of automated material handling systems.

We support customers with pre-installation services such as piping and instrumentation, and we tailor every project to specific site and equipment requirements.

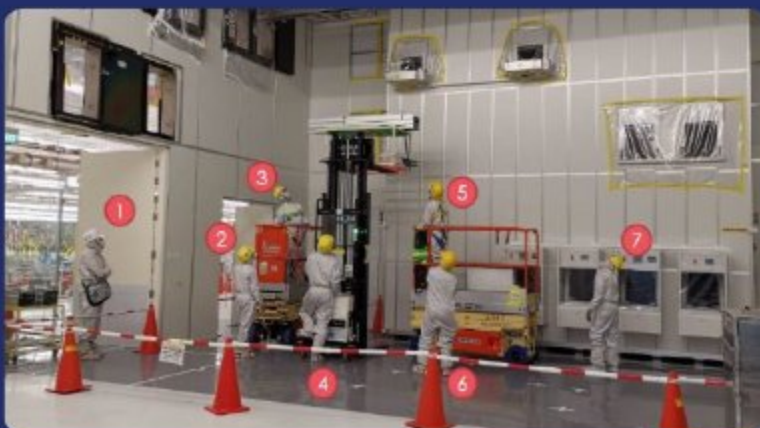

Beyond Singapore, Build-IT services are delivered worldwide. From photolithography systems to factory automation, we have executed projects in more than 12 countries.

Customers trust us to handle the most advanced and expensive manufacturing tools with the highest standards of cleanroom precision.

Our Build-IT capabilities include:

- Class-1000 cleanroom for assembly, testing, and customer training (Singapore)
- Mechanical installation and set-up of advanced manufacturing tools (global)
- Installation and decommissioning of photolithography systems (global)
- Integration of automated material handling systems (AMHS) (global)
- Pre-installation services including piping and instrumentation (global)
- Experience delivering projects in 12+ countries

OUR WAREHOUSING CAPABILITIES INCLUDE:

- Controlled storage environments
- 24/7 monitoring
- Scalable loading
- Compliance-ready operations
- Heavy-duty handling

BHS
STORE-IT

SAFE & SECURE

PRECISION WAREHOUSING SOLUTIONS

B H S delivers Precision in warehousing by combining safety, security, and readiness. With more than 15 years of experience, we ensure high-value and sensitive cargo is stored with care and always transport-ready. Our team manages every detail so customers can count on accurate indexing, strict schedules, and reliable handling.

Our facilities include climate- and humidity-controlled storage alongside ambient storage options. With more than 200,000 square feet of space, we support industries that require both scale and precision, including technical needs such as nitrogen and compressed air supply for specialised equipment.

Security and compliance are integral to Precision. Our warehouses are monitored 24/7 by CCTV, supported by STP (Secure Trade Partnership) and ZG (Zero GST) certifications, and equipped with heavy-duty forklifts to handle diverse cargo safely.

OPERATIONAL EXPERTISE IN EVERY MOVE PRECISION IN TRANSIT

- Engineered transport for sensitive equipment
- Route planning and risk assessment
- Load securing and handling protocols
- Air-ride and temperature control
- Tail-gated loading configurations

BHS
TRUCK-IT

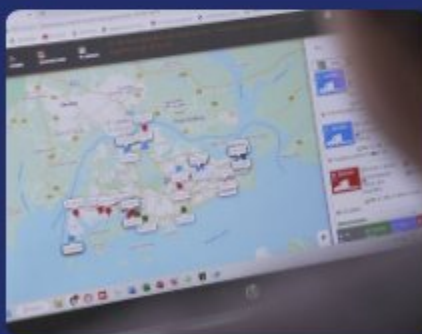

**PRECISION THAT DELIVERS
PEACE OF MIND**

PROFESSIONALLY CUSTOMISED TRANSPORT FLEET

B H S delivers Precision across every mile. Our fleet supports first and last mile movements from air and sea terminals to customer locations, including cross-border routes into new markets. We specialise in moving high-value and highly sensitive cargo safely, securely, and on schedule.

When customers choose our trucking services, they also have the option of warehousing and move-in or move-out support, as required, because B H S is a full-service provider.

In addition to ad-hoc transport, we also offer subscription-based trucking services to meet ongoing customer needs.

Every project is engineered for Precision, with site surveys, what-if scenarios, and simulations carried out before work begins.

Our Trucking capabilities include:

- First and last mile transport from air and sea terminals
- Air-ride and temperature-controlled units for sensitive cargo
- Tail-gated lorries in multiple sizes for flexible handling
- Subscription-based trucking services
- Optional warehousing and move-in/move-out support

Safe, compliant operations managed by trained professionals

SATISFIED CUSTOMERS THROUGH PRECISION DELIVERY

Before each project, we carry out detailed surveys to design the safest and most efficient plan. No two projects are alike, and every solution is tailored to the site, the equipment, and the customer's requirements.

BHS
MOVE-IT

**DONE RIGHT WITH
PRECISION**

PROFESSIONAL HANDLING, RIGGING, MOVE-IN AND RELOCATION SERVICES

B H S delivers Precision in every move-in and relocation.

When entire production lines are being relocated, we coordinate with our trucking, warehousing, and rigging services. Customers leave the scheduling and resource management to us, confident they have a full-service provider applying Precision across the entire process.

Our teams combine technical training, engineering expertise, and specialised equipment to handle high-value tools and machinery with accuracy and care. From high-tech to advanced manufacturing environments, we provide professional rigging and relocation services that customers trust to be safe, precise, and on schedule.

Our Move Capabilities include:

- High-value tool and equipment handling
- Production lines relocations
- Rigging in high-tech and advanced manufacturing environments
- Coordination across trucking, warehousing, and installation services

LAYERS OF PROTECTION

- Rigid crating with internal blocking
- Cushioning to absorb shocks and vibration
- Moisture and humidity control
- Barriers against environmental damage

BHS
PACK-IT

PRECISION THAT PROTECTS

Pack-IT delivers Precision in export packaging. We design and build crating for high-value, sensitive machines to withstand the rigours of air and sea transport.

Our engineers customise every solution, whether decommissioning tools for overseas transfer or preparing new machines for export. Each package controls vibration, impact, and humidity, and meets international standards.

Trusted by global manufacturers, Pack-IT gives confidence that every shipment arrives safe, secure, and ready for use.

Our Pack-IT capabilities include:

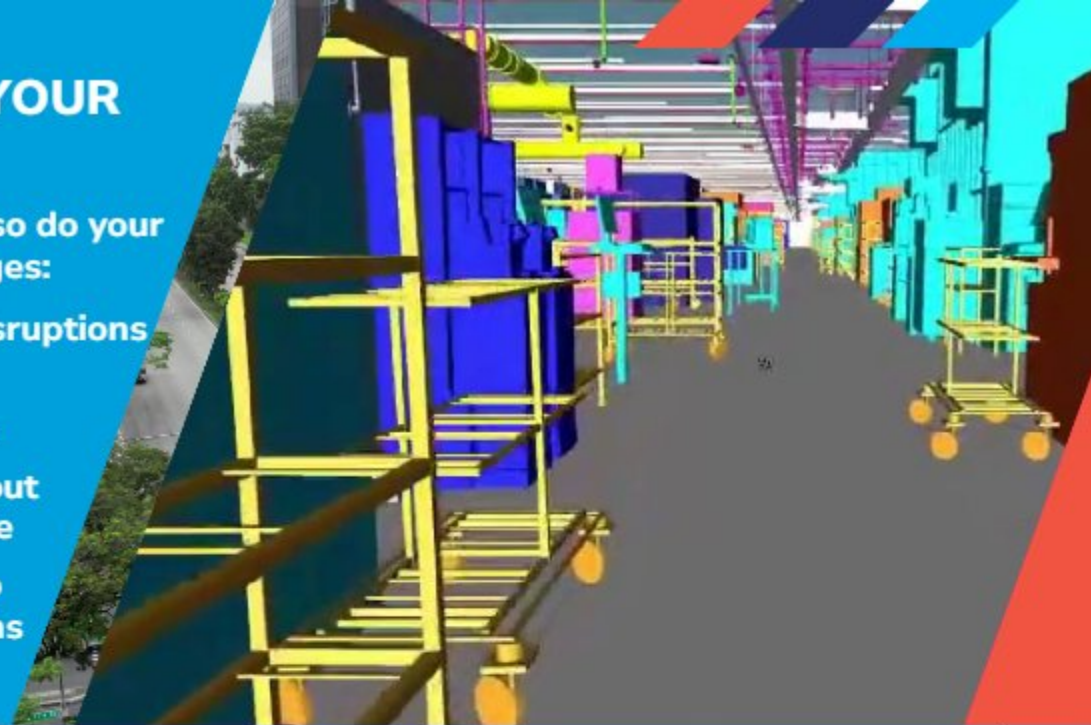

- Export-ready crating for sea and air shipments
- Packaging support for machine decommissioning and overseas transfers
- Custom designs for oversized or complex machinery
- Vibration and impact control systems for sensitive cargo
- Humidity and climate-protection solutions

YOUR FACILITY, YOUR CHALLENGES

As Industry 4.0 evolves, so do your facility planning challenges:

- Avoiding production disruptions
- Ensuring precision in automation integration
- Providing a unified layout for teams to collaborate
- Running simulations to make informed decisions

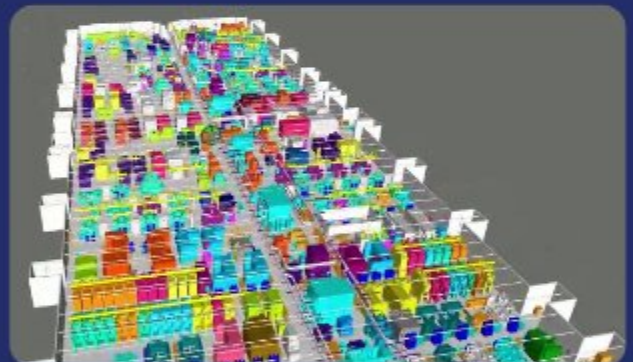

BHS
TWIN-IT

DIGITIZE. MODEL. OPTIMIZE.

TWIN-IT: PRECISION IN DIGITAL FACTORY MAPPING

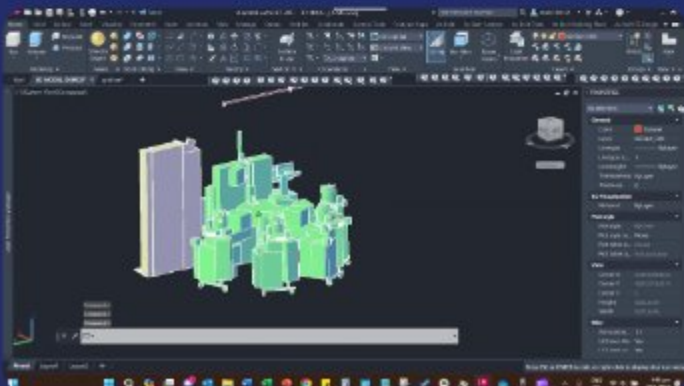

Twin-IT is a new capability from B H S, bringing Precision into the digital planning space. Using advanced 3D scanning and datum marking, we create accurate digital twins of factories to support smarter layouts, workflow optimisation, and preparation for automation.

Already proven in selected projects, Twin-IT gives customers a reliable foundation for planning. Interactive models allow collaboration across teams, reduce costly trial-and-error, and eliminate downtime during layout changes. With Precision, customers can plan expansions, integrate robotics, and prepare confidently for Industry 4.0.

Our Twin-IT capabilities include:

- Datum marking and high-precision 3D mapping (up to 2mm accuracy)
- Interactive digital twins for facility planning
- Layout simulations without production downtime
- Collaborative planning across design, operations, and management
- Optimisation for automation and robotics integration
- Scalable planning for future growth

OUR GLOBAL FOOTPRINT

B H S is extending Precision worldwide. Since 2023, we have expanded beyond Singapore into Malaysia, North America, and Europe, supporting multinational customers wherever they grow.

Our presence across regions allows customers in semiconductors, advanced manufacturing, and high-tech industries to rely on one service provider with consistent standards and proven risk management, delivered with the same Precision in every market.
